### Owner

**Bird's Eye Foods**  
P.O. Box 1510  
Watsonville, CA 95076

### Project

**Process Floor Renovation**  
345 Harvest Drive  
Watsonville, CA 95076

## Project Summary

**Substrate**  
Poured Concrete

**Surface Preparation**  
SSPC SP-13

**System**  
UCRETE® HF

**Project Completion Date**  
Summer 2004

## Project Description

The engineers at Bird's Eye Foods spent decades replacing floors at their process plant. They had essentially budgeted every year to have floor maintenance done in order to keep up with regulations.

When they came to Polytech, they were skeptical that anything would perform on a long-term basis. They had other contractors that guaranteed the same result.

They took a "since it needs to be done, let's give it to Polytech." attitude. During installation, they became aware that we approach projects very different than most contractors. They commented, "we can not believe you provided an hour by hour schedule with each activity listed."

Polytech installed 10,000 square feet of UCRETE® HF with 75% of the floor under equipment in 5 days.

After one year of service with no failures, Bird's Eye became convinced that Polytech Industrial, Inc. provided the solutions they promised.
