Project

Barrel Storage Room
6154 Silverado Trail
Napa, CA 94558

Project Summary

Substrate
Poured Concrete

Surface Preparation
SSPC SP-13

System
Tnemec Series 224 Deco-Fleck®

Project Completion Date
Spring 2004

Project Description

When this ultra-premium wine producer builds a new barrel storage room, it needs to be perfect in all ways. From state-of-the-art stainless steel barrel storage systems, to walls that are as beautiful as they are durable.

The construction delivered everything except the flooring system that was installed by a national installer of high performance flooring. It looked good when the installation was done, but within weeks the system began to fail. The entire floor system was coming apart from the bottom.

By the time Polytech was called in to make a recommendation for proper replacement of the system, Shafer owners were furious. They had no confidence in the seamless flooring industry. However, they could not leave this floor as it was.

After a long and detailed process, Shafer selected Polytech to complete the floor replacement.

Shafer has used the floor for over a year now and there has not been one sign of failure.

Shafer found their flooring solution in Polytech Industrial, Inc.
