Project Summary

Substrate
Acid Brick Tile

Surface Preparation
SSPC - SP 13 Cleaning Concrete
for Coating

System
Dex-O-Tex SC Membrane /
Colorflake

Project Completion Date
January 2006

Project Description

This project was awarded to Polytech Industrial, Inc. strictly via word of mouth. When Plant Managers toured the Carson, CA Pepsi facility and reviewed flooring work installed, they knew they found the company to perform work on their own floors.

Polytech crews started preparation operations for this project on Friday afternoon, and installed the flooring system on Saturday and Sunday. This allowed Pepsi to start up thier operation on Monday morning to ensure that they could serve thier customers.

Another satisfied Polytech Industrial, Inc. customer.
