San Diego, CA

Project Summary

Substrate
Concrete

Surface Preparation
SSPC - SP 13 Cleaning Concrete
for Coating

System
Dex-O-Tex Tek Crete TT

Project Completion Date
February 2006

Project Description

The Can Line at Pepsi really never shuts down. People always need Pepsi. However, flooring needed to be installed to maintain the companies never ending commitment to quality products and facilities.

That is why Pepsi chose Polytech Industrial, Inc. to install a fast setting polyurethane concrete flooring system.

The finished system prevents slips, bacteria growth, harbour points, and lightens the entire area around the Can Line.
