Project Summary

Substrate
Poured Concrete

Surface Preparation
SSPC-SP 13/NACE No. 6 Surface
Preparation of Concrete

System
Sika Covercrete GT

Project Completion Date
12/2007

Project Description

Advanced H2O is a premium producer of bottled water that wants to ensure that its facilities meet the highest sanitary standards available. In that pursuit, they contacted Polytech Industrial, Inc. for recommendations on protection and cleanability of flooring in their R.O and bottling areas.

Polytech Industrial recommended and subsequently installed Sika Covercrete GT trowel applied polyurethane cement flooring and Covercrete V trowel applied polyurethane cement coving.

The project was completed to the owners satisfaction and Advanced H2O now has permanent solution to keep their floors clean and protected.
