

## Project Case Study

### Owner

**Chappellet Winery**  
1581 Sage Canyon Road  
St. Helena, CA 94574

### Project

**Barrel Storage Room**  
1581 Sage Canyon Road  
St. Helena, CA 94574

## Project Summary

### Substrate

Poured Concrete

### Surface Preparation

SSPC-SP 13/NACE No. 6 Surface Preparation of Concrete

### System

Tneme Series 237 Power  
Tread/Tneme-Glaze 280/ Series  
294 CRU

### Project Completion Date

Fall 2007

## Project Description

The Chappellet Family pays attention to detail in crafting their fine wines. So when it came time to install seamless industrial flooring at the Tank Farm and Tasting Areas of the winery, the owners put in significant time researching systems and installers that were suitable for their facility.

How long has the material supplier been in business? How many high end winery tank farms have you installed? Take me to tour projects that you have installed? These were just a few of the questions put to Polytech Industrial, Inc. during the interview process. After passing this process with flying colors the real work started.

At Chappellet, you don't just pick a color out of a book. Samples have to be created and looked at over time with different variations of light on them. The system has to have the correct sheen. The color has to be the exact shade.

After satisfying this precise process, Polytech Industrial, Inc. installed the perfect floor system adding beauty and durability to an already prestigious facility. Another satisfied Polytech customer.
