SSPC-SP 13 Preparing Concrete  
for Coating

**System**  
Flowcrete MF / Tnemec 273  
Stranlok ML

**Project Completion Date**  
2008

## Project Description

NuScience had a need for smooth, cleanable floors that provide a great appearance. After exhaustive research, they called upon Polytech Industrial, Inc. to install Flowcrete MF. Flowcrete provides a smooth finish polyurethane cement that will withstand heavy thermal shock and still be very easy to clean.

The walls of the Pharmaceutical Production room were reinforced with a fiberglass system, effectively proving clean room type quality.
