Sika Sikafloor 261 System 4

Project Completion Date
2008

Project Description

Kyoho produces automobile frames for Toyota Motor Company.

They required cleanable flooring resistant to hydraulic fluids for installation around robotic lines and supporting hydraulic cabling tunnels.

Kyoho operates a state of the art manufacturing facility with a penchant for strong operating capabilities and organization.

Gray Construction built the plant and provided only the best subcontractors to Kyoho in order to achieve their high quality and organizational standards.

Another quality Polytech Industrial, Inc. project.
