Substrate
Poured Concrete

Surface Preparation
SSPC-SP 13/NACE No. 6 Surface
Preparation of Concrete

System
Tnemec 244 Ultra-Tread M

Project Completion Date
Fall 2008

Project Description

Staff at Oregon State University Veterinary Medicine Department pride themselves on outstanding research and medical facilities.

When it came time to replace flooring in Procedure Rooms at Magruder Hall, they put their research skills to use. The company that had originally installed the flooring being replaced was no longer around. Oregon State University had heard of a company that was installing flooring with great success and customer accolades called Polytech Industrial, Inc.

When they contacted us, they were quite surprised to have someone come out so quickly and complete a thorough analysis of the existing conditions. A system specification was developed and the project scheduled to bid. Polytech Industrial, Inc. was competitive in their bid and won the project.

The flooring system was installed over a week long shutdown after all existing flooring was removed and the concrete prepared.

The PhD's that use this flooring on a daily basis have expressed their pleasure with the outstanding clean-ability, slip resistance, and great appearance. Future projects at the facility will utilize the same flooring type.
