Project Summary

Substrate
Poured Concrete

Surface Preparation
SSPC-SP 13 Preparing Concrete
for Coating

System
Quartz-Clad HD

Project Completion Date
Spring 2008

Project Description

Constellation Wine has relied on Polytech Industrial, Inc. flooring systems many times in the past. So when it came time to have this very visible floor area completed, they turned to Polytech Industrial again.

The floor need to be durable when subjected to truck traffic, hose coupling drops, continual wash down, and chemical exposure. It also had to look good to the many visitors that pass it while on tours of the winery.

Quartz-Clad HD was the natural fit. Quartz-Clad HD provides a decorative finish in a heavy duty system.

Polytech Industrial, Inc, Quartz-Clad HD was installed and continues to serve today.
